Rich,

Just spoke with [redacted] Let him know that we have recommended to the EPA a "do not use until further notice" for the water in the area, including [redacted] well. Let him know that the maximum values on his well are not immediately concerning to us, but that the concern about data quality, lack of analytical parameters, and little recent data led us to this conclusion. Also told him about the confluent growth of coliform for his well in the past and this is a bit concerning too. I said that he should decide whether or not to consume and use the water, but our current position is that we are taking the precautionary step of recommending no use until better data is available to define the situation.

He appreciates the information and looks forward to speaking with you again Rich. He asked if EPA can order Cabot to begin providing water again, and I told him I was not in a position to discuss what EPA can do and that you would be discussing the issue again with him soon.
